

Your old cell phone can save a life!

With a \$25 donation, DaVita Village Trust will provide one lifesaving CKD screening, dialysis treatment or primary care service.

Making a Difference - Cellular Recycler is making a difference by supporting The Davita Village Trust, a nonprofit organization that is improving kidney health, primary health and chronic kidney disease (CKD) awareness while saving lives through early detection testing, kidney care education and increased access to dialysis treatment and primary care in underserved communities around the world.

Where do the phones go? All cellphones received will be either recycled or reused. Cellular Recycler has a full repair and refurbishment facility for phones to be given a new life. Those phones that cannot be saved will be recycled responsibly in the United States. No cell phones will ever go outside of the United States to be destroyed.

Green Fundraising Cellular Recycler, DaVita Village Green and DaVita Village Trust have partnered together to hold an environmentally friendly fundraiser for everyone's involvement. We need your help: Clean out your drawers of old electronics, keep them out of landfills and help support a great cause!
